Biography

Vladislav Tushkanov

Senior Data Scientist, Kaspersky

Vladislav Tushkanov is a Senior Data Scientist at Kaspersky and an expert in AI and machine learning. Throughout his seven years in cybersecurity, Vladislav has worked on applying data science and machine learning techniques to enhance various technologies, from content filtering systems to automated phishing detection and privacy protection.

Vladislav has also been busy raising awareness about privacy, security, and the pitfalls of machine learning systems when applied to cybersecurity and other critical domains, as well as the malicious use of machine learning, such as deepfakes. He has authored numerous articles on the aforementioned topics and regularly speaks at global events.
